

SEC Consult is the leading European consultancy for application security services and information security, with offices in Europe, Asia and North America. SEC Consult is a specialist for the development of security information management processes and certification processes (ISO 27001), cyber defense, DDoS testing, external and internal security audits, secure software development and sustainable improvement of security levels. For immediate placement we are looking for an

## IT- & Cyber Security Analyst (f/m) for our locations in Berlin and Vienna

### Your tasks ...

- Providing pro- and reactive technical support for a 24-hour service (including security configurations, policy modification recommendations and diagnostics of remote network security issues)
- Identifying customer security issues, providing accurate analysis, troubleshooting, coordinating resolution or recovery using a variety of applications and testing tools (Hardware/software failures, security breaches, threats, ...)
- Professional handling of inbound security incidents (from trouble shooting to communication with customer)

### Your qualifications ...

- MA degree in computer science or any equivalent education
- 2-4 years of relevant work experience
- Strong technical analytical skills
- Background in networking or security (incl. intrusion detection/prevention)
- Knowledge of security applications such as IDS, Security Information and Event Management (SIEM) as well as anomaly detection tools
- Operational understanding of test and analysis equipment such as protocol analyzers, intercepting proxies, sniffers, etc.
- Experience with processes in functional areas (trouble, incident & crisis management)
- Basic forensic skillset
- Organizational as well as multitasking talent who is a passionate and creative as well as self-regulated problem-solver
- Excellent German and English skills

### We provide ...

- To work for a successful, international and innovative information security company
- Possibilities of knowledge enhancement in different areas of information security (e.g. incident response, forensic, mobile security, reverse engineering, ...)
- Exciting and broad area of work with experienced security experts
- A young and motivated team
- The possibility to boost your know-how
- Mobile phone, notebook and internal events

For this position, we offer an annual income of gross **50.000 EUR**. Depending on your qualification and experience, we offer a correspondingly market-compliant overpayment.
